SAS 9.4 Installation Instruction

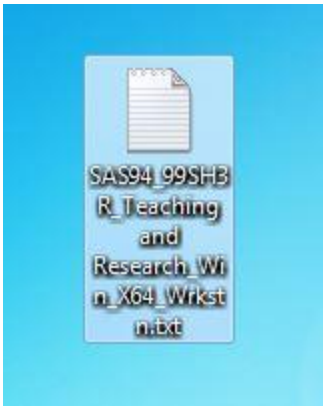

Windows

1. You can install this software from media or from the ISO files (v9.4 only).

   In addition to the media set or ISO files you will also need the license file.

   You can retrieve these files by logging into the WebStore and clicking on Order History.

   The download link is on this page. Choose the license file that matches your version of SAS and bit of Windows.

2. To prevent wasting time, make sure you reboot your computer before starting this installation.

   Otherwise, you may spend an hour going through the installation process only to see the below screen later in that process.

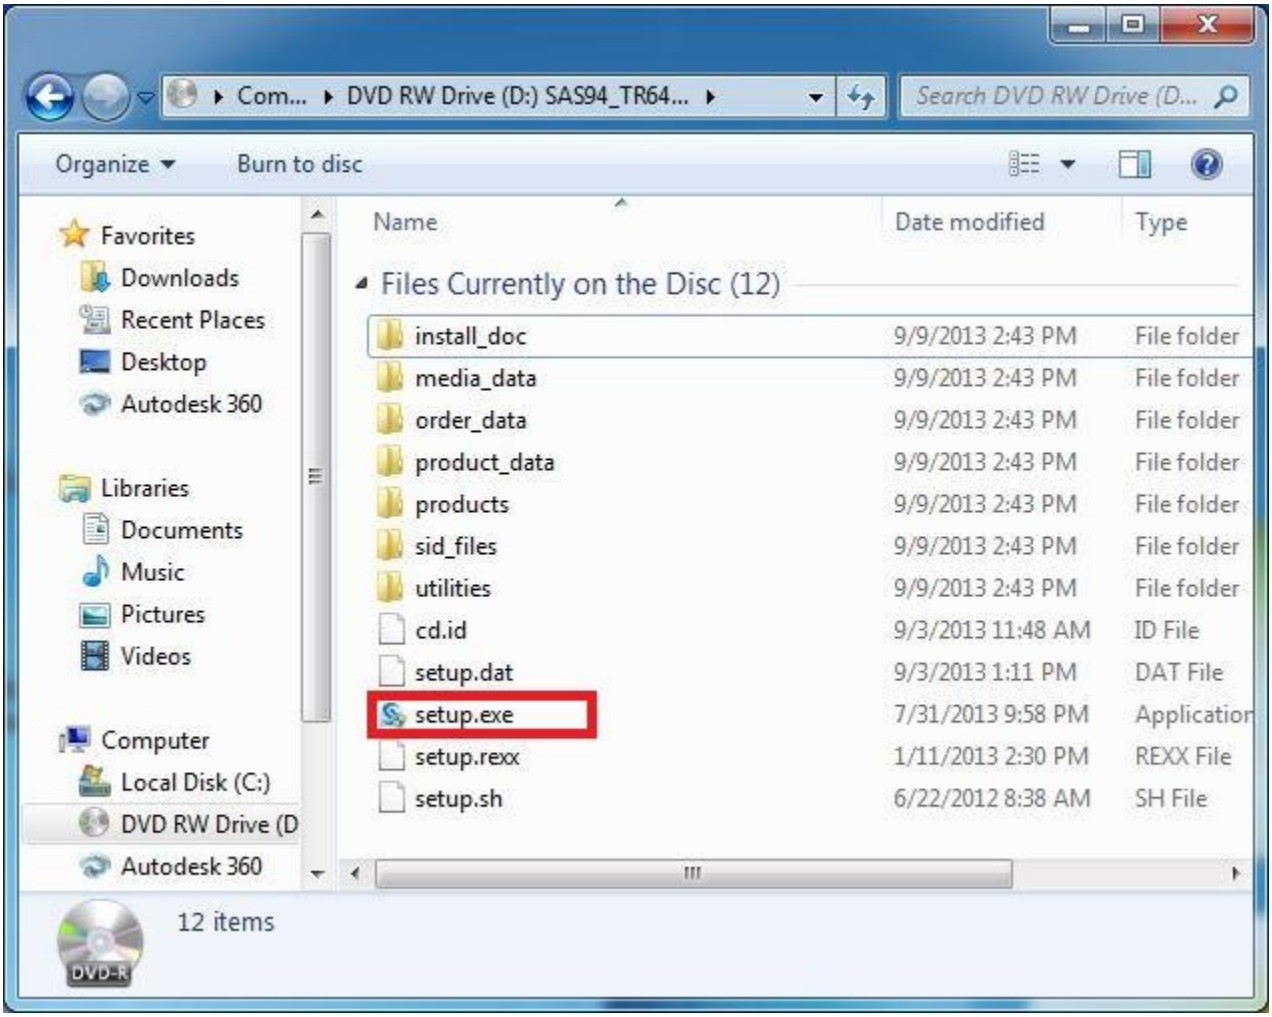

3. Installing from DVD, insert disk 1 into the DVD drive of your computer and double click setup.exe.

   OR

   Installing from a downloaded ISO, right click each of the ISO files and choose Mount from the menu.

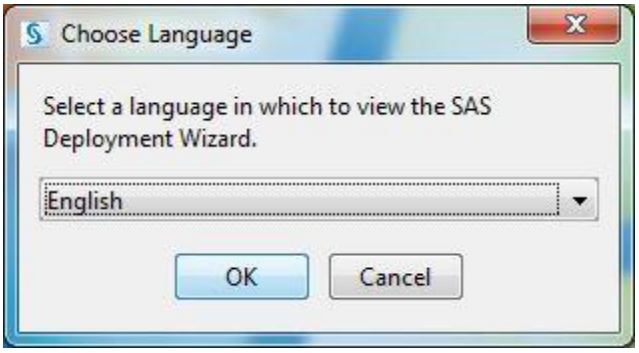

Double click the ISO DSK1 and then double click setup.exe.

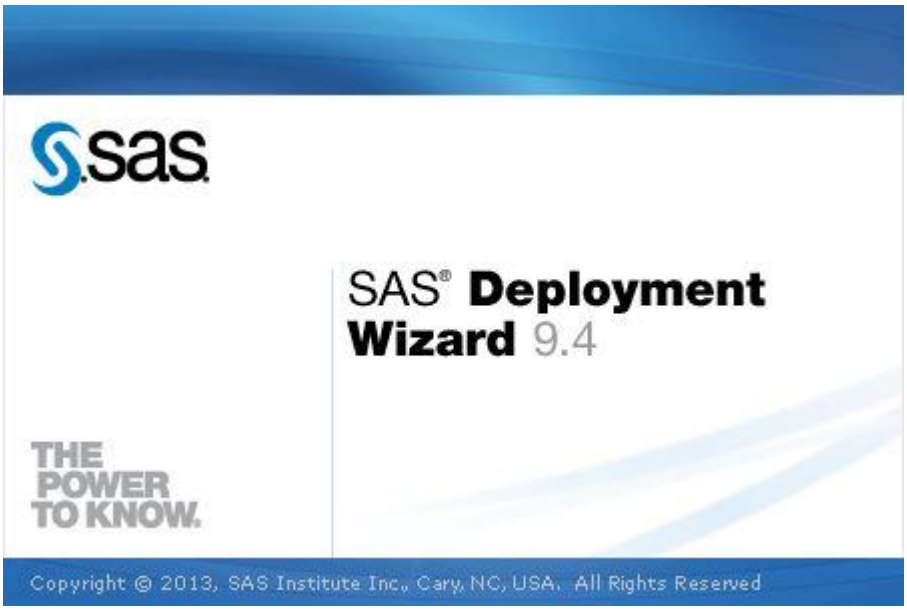

4. The SAS Deployment Wizard will open.

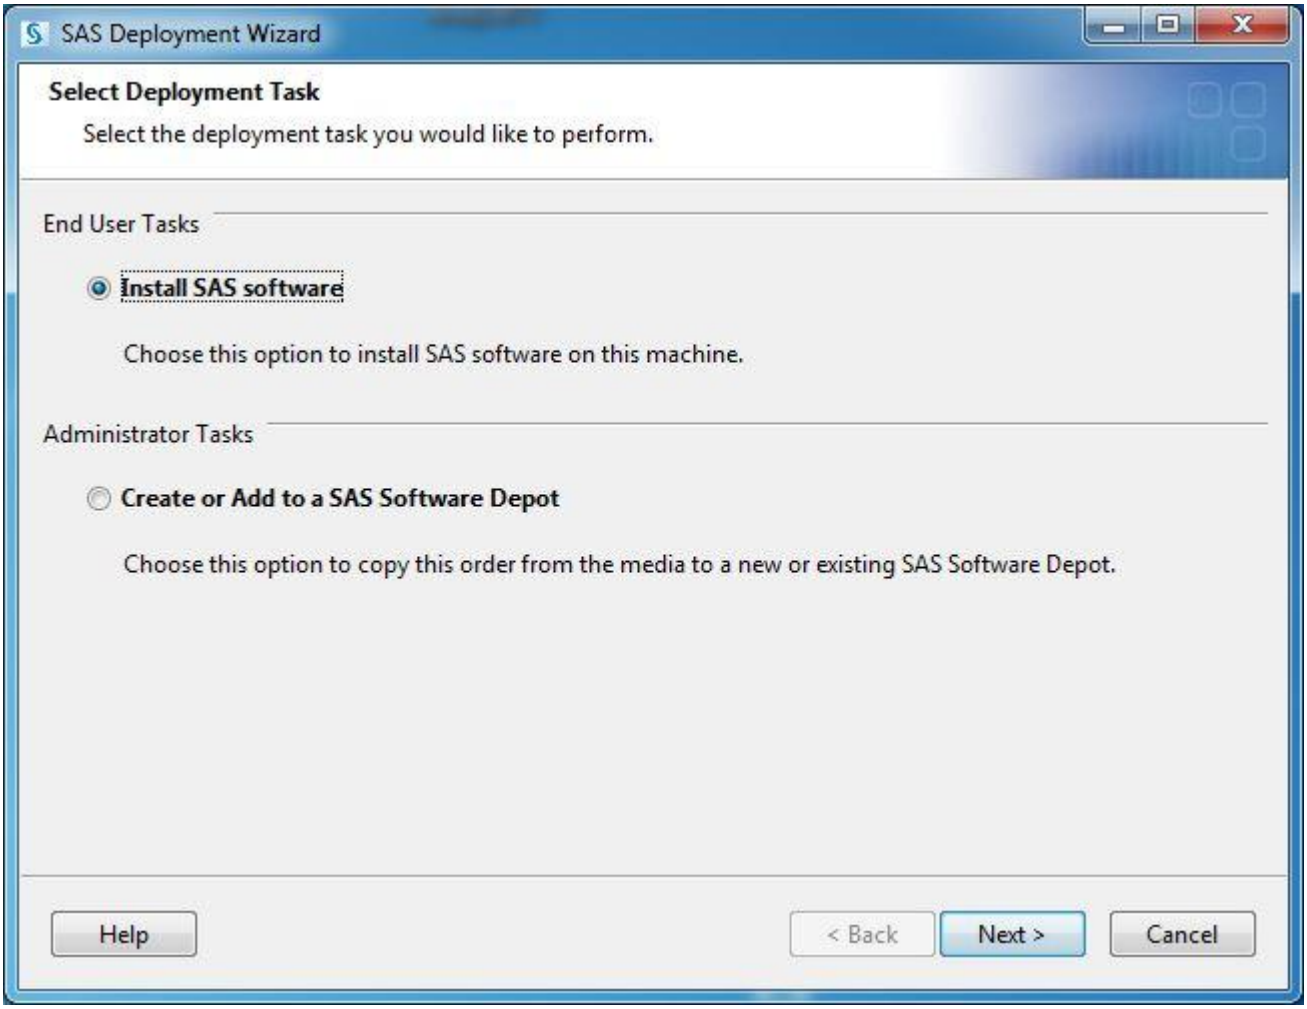

5. Choose a language and click on *OK*.

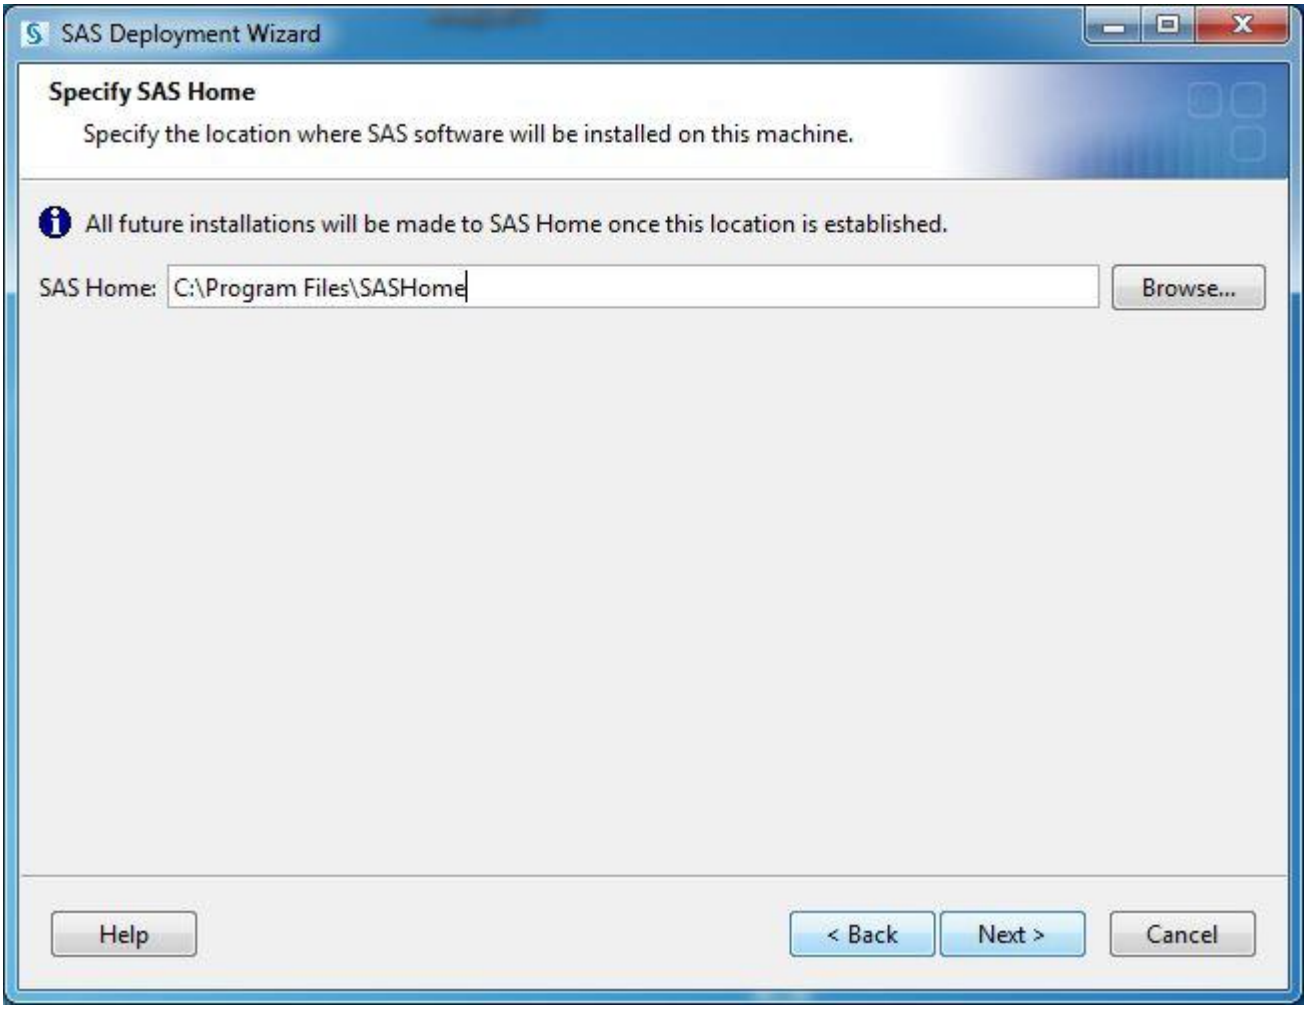

6. The SAS Deployment Wizard will appear again. In our test installation this window may appear for 15+ minutes.

13. Browse to the file on your computer and click on *Open*. Click on *Next*.

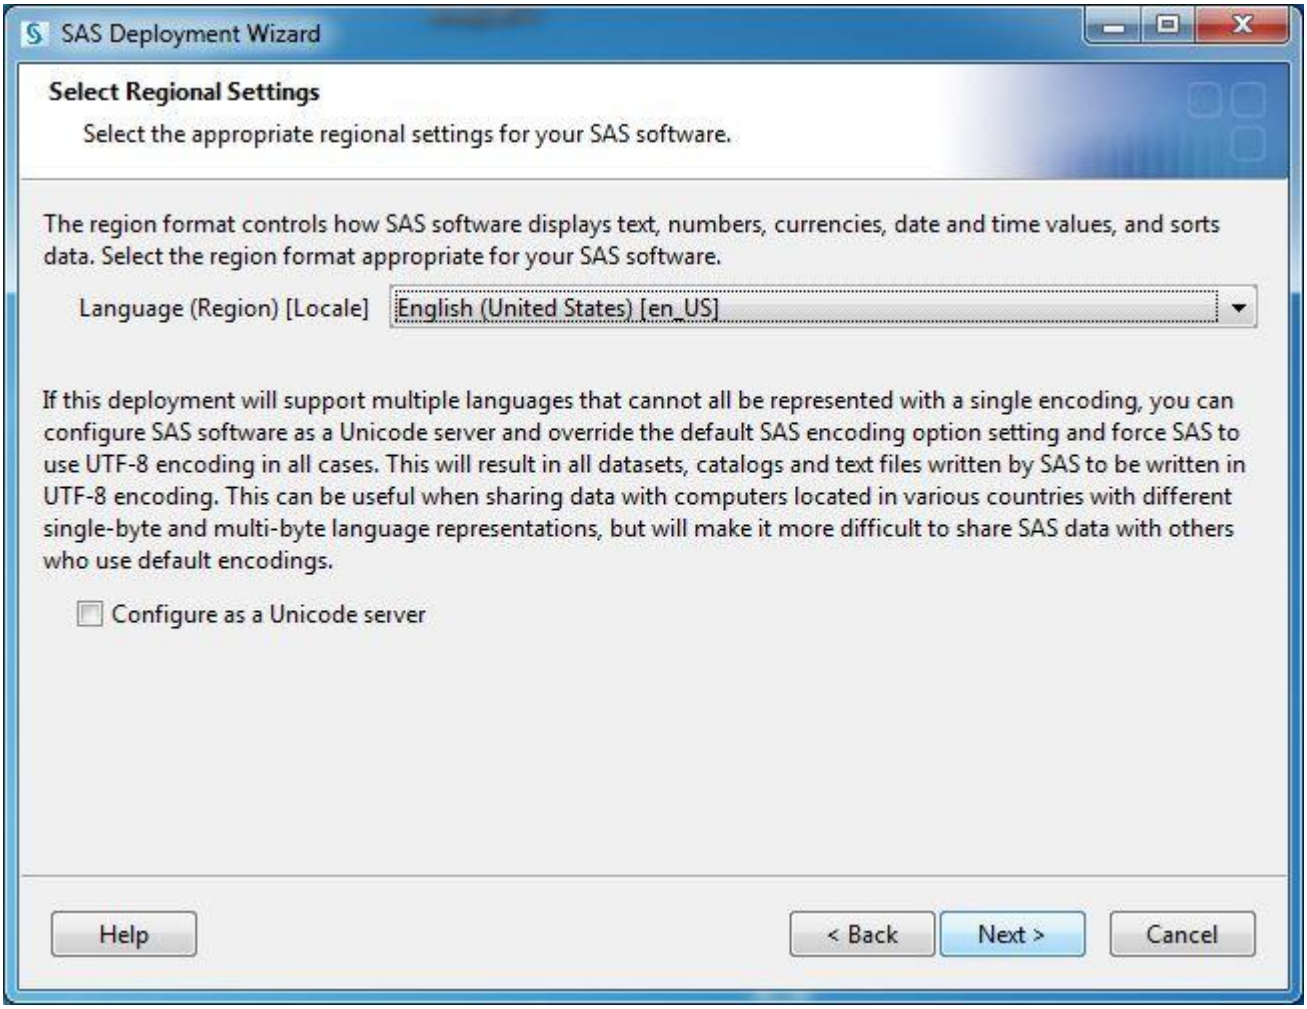

14. Select the languages you wish to install and click on *Next*. English is set by default.

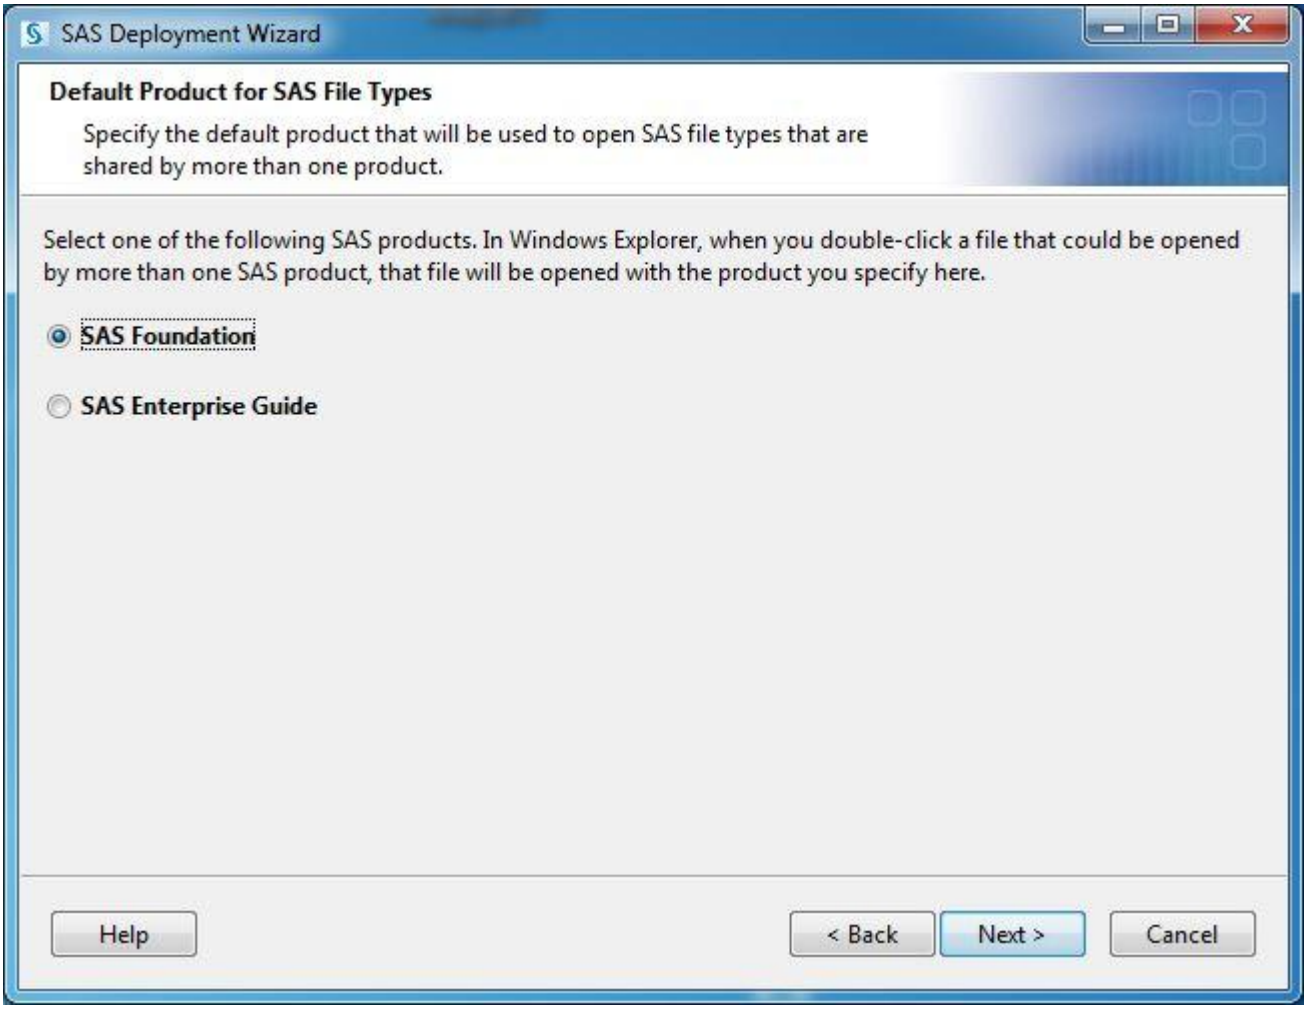

You can click on *Clear All* and only install the English language support.

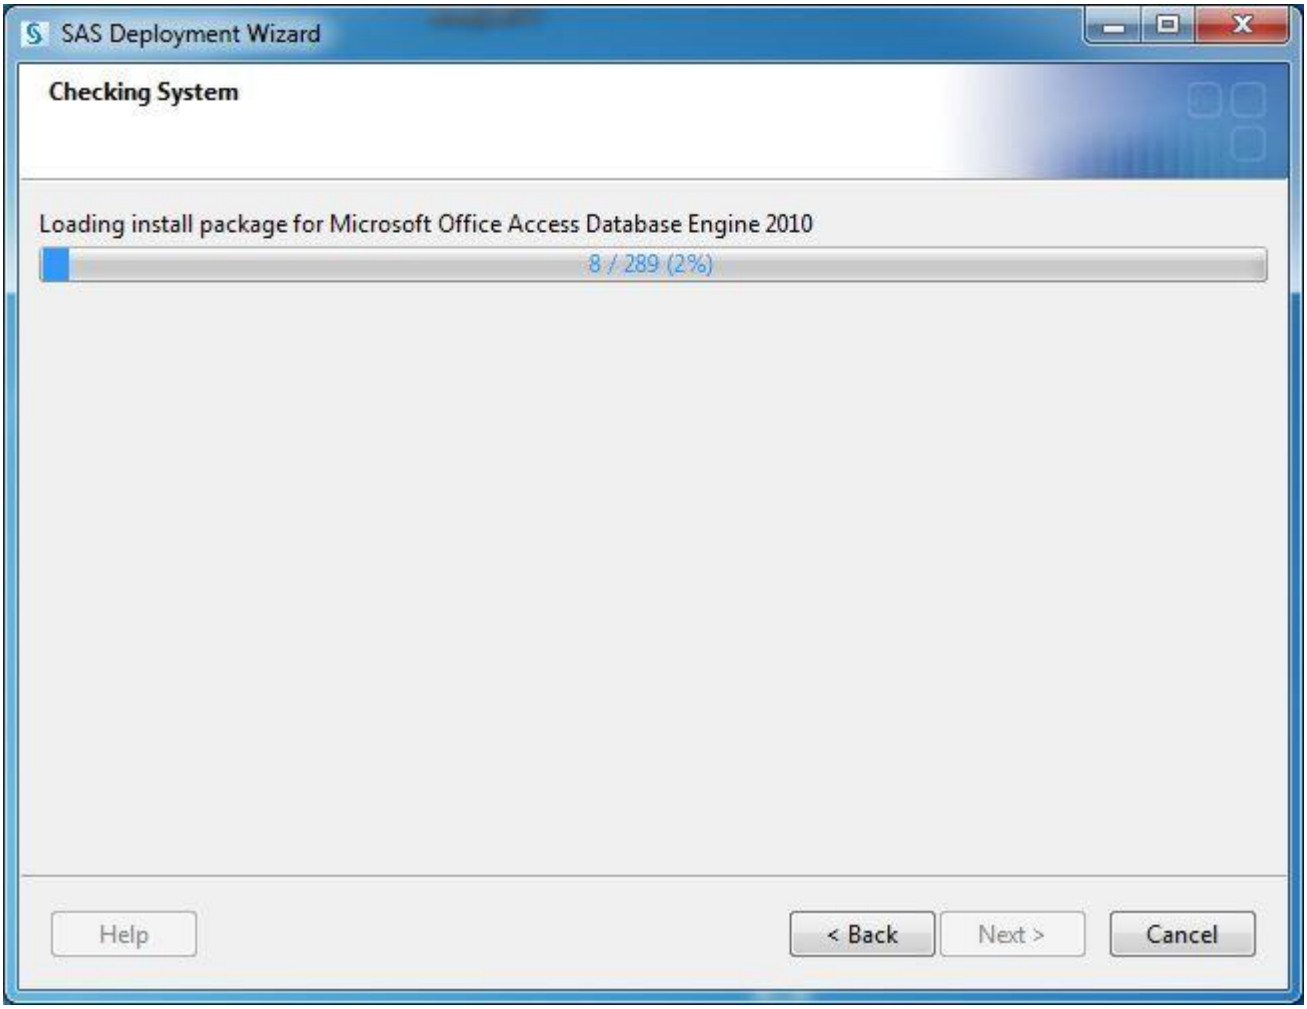

15. Select the regional settings and click on *Next*.

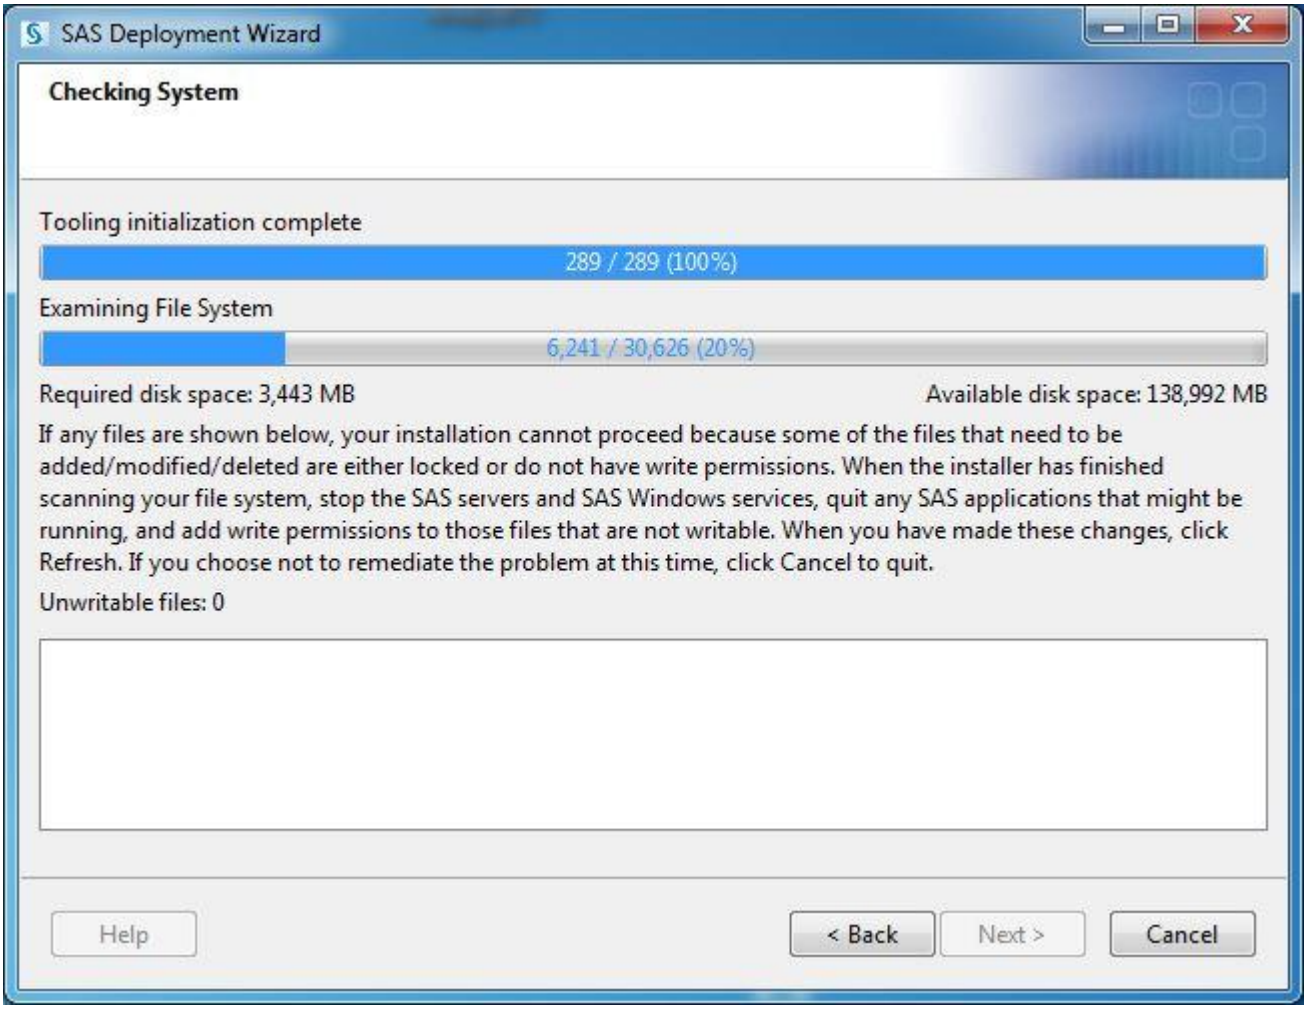

16. Select the default product for SAS file types and click on *Next*.

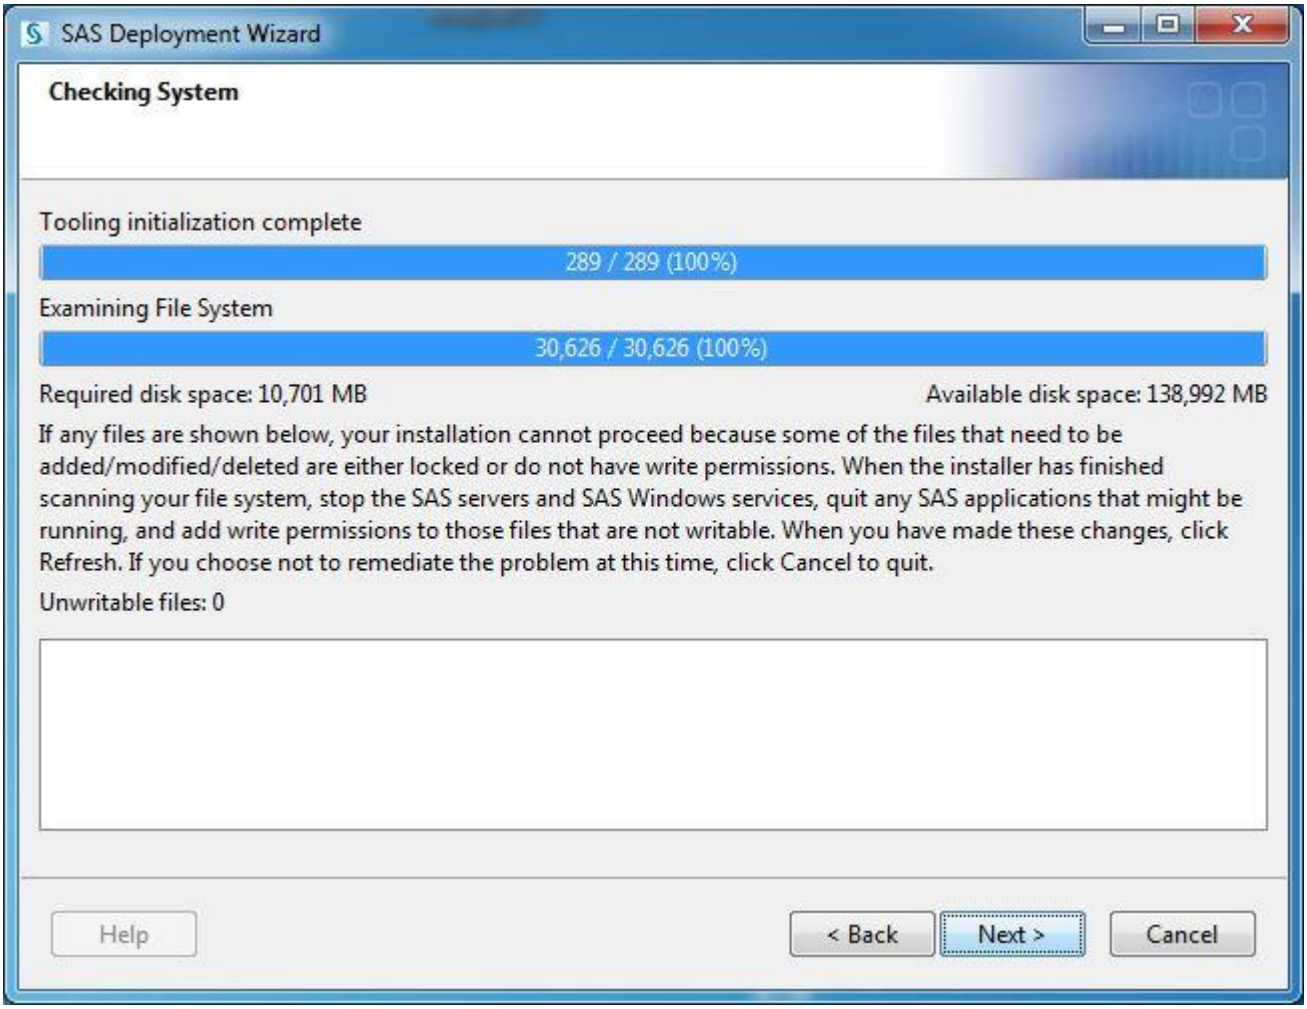

17. The install packages will load.

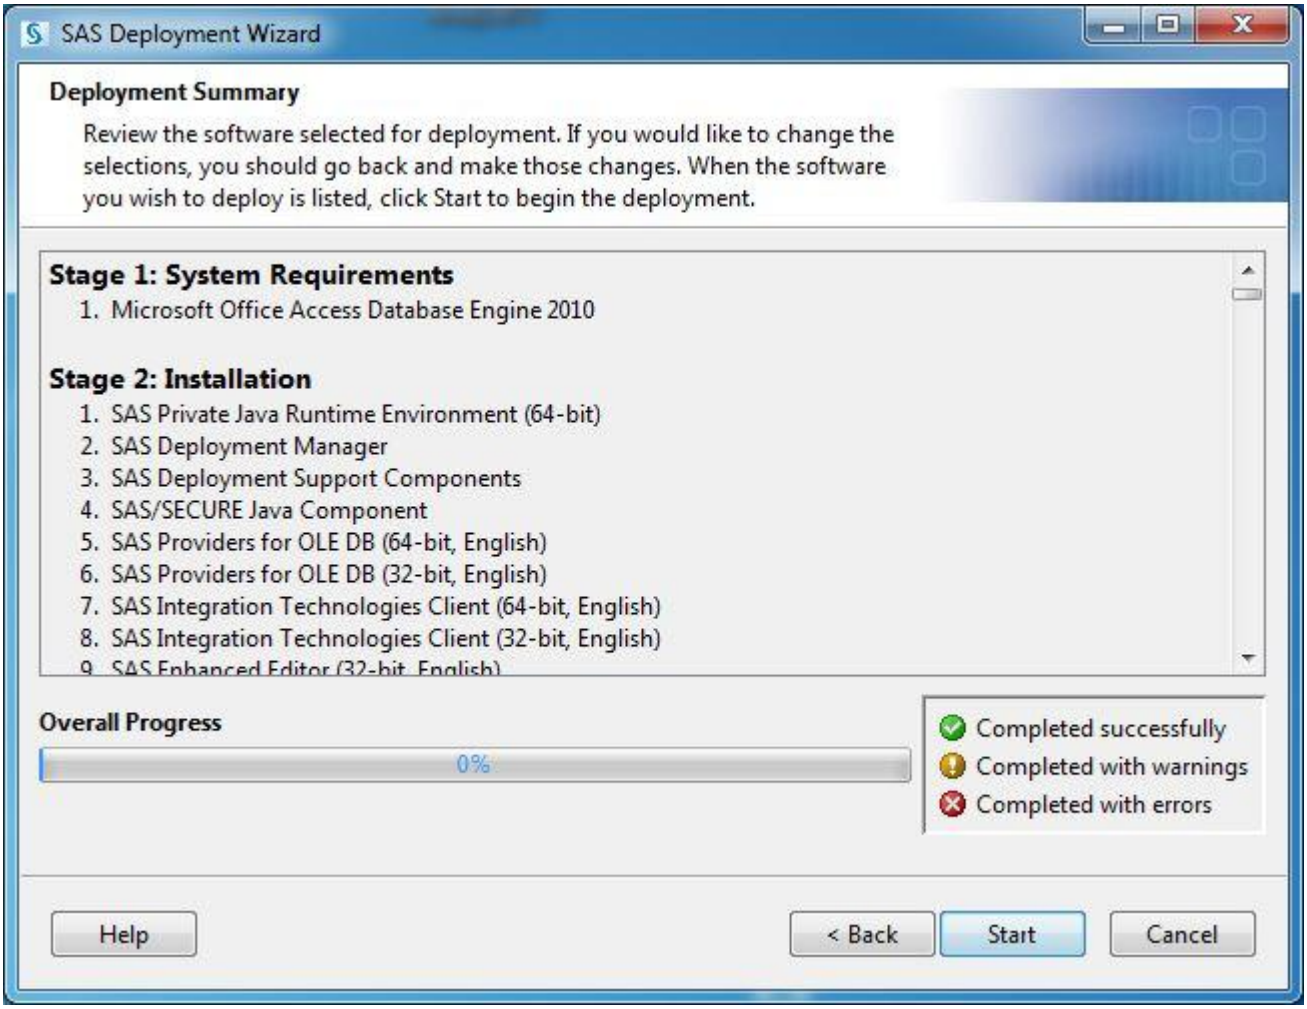

18. You system will be checked.

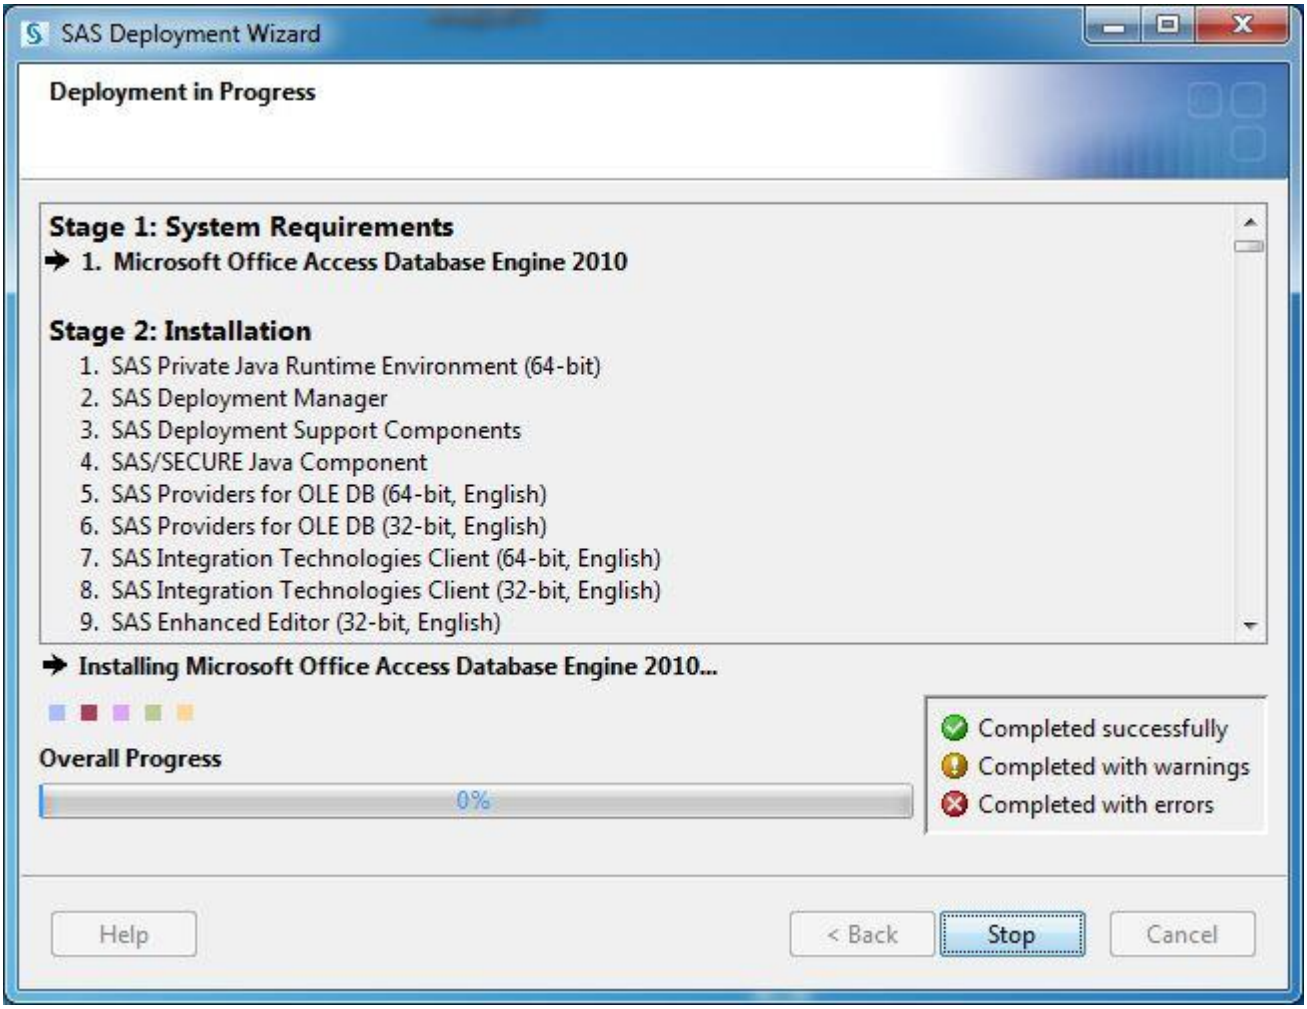

19. Click on *Next*

20. Review your installation and click on *Start*.

21. The installation will begin and will take several hours.

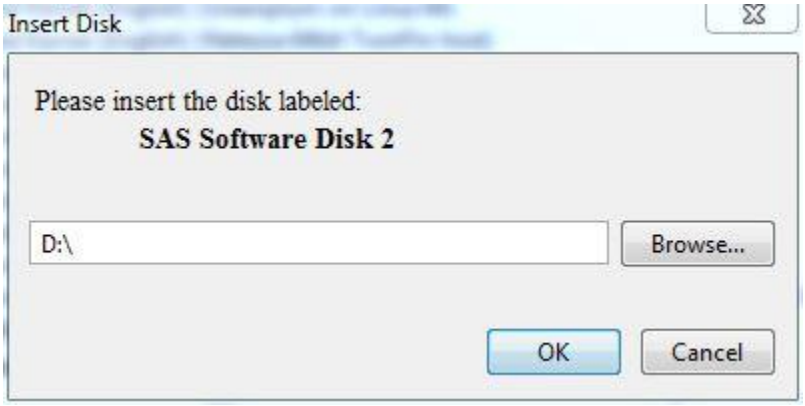

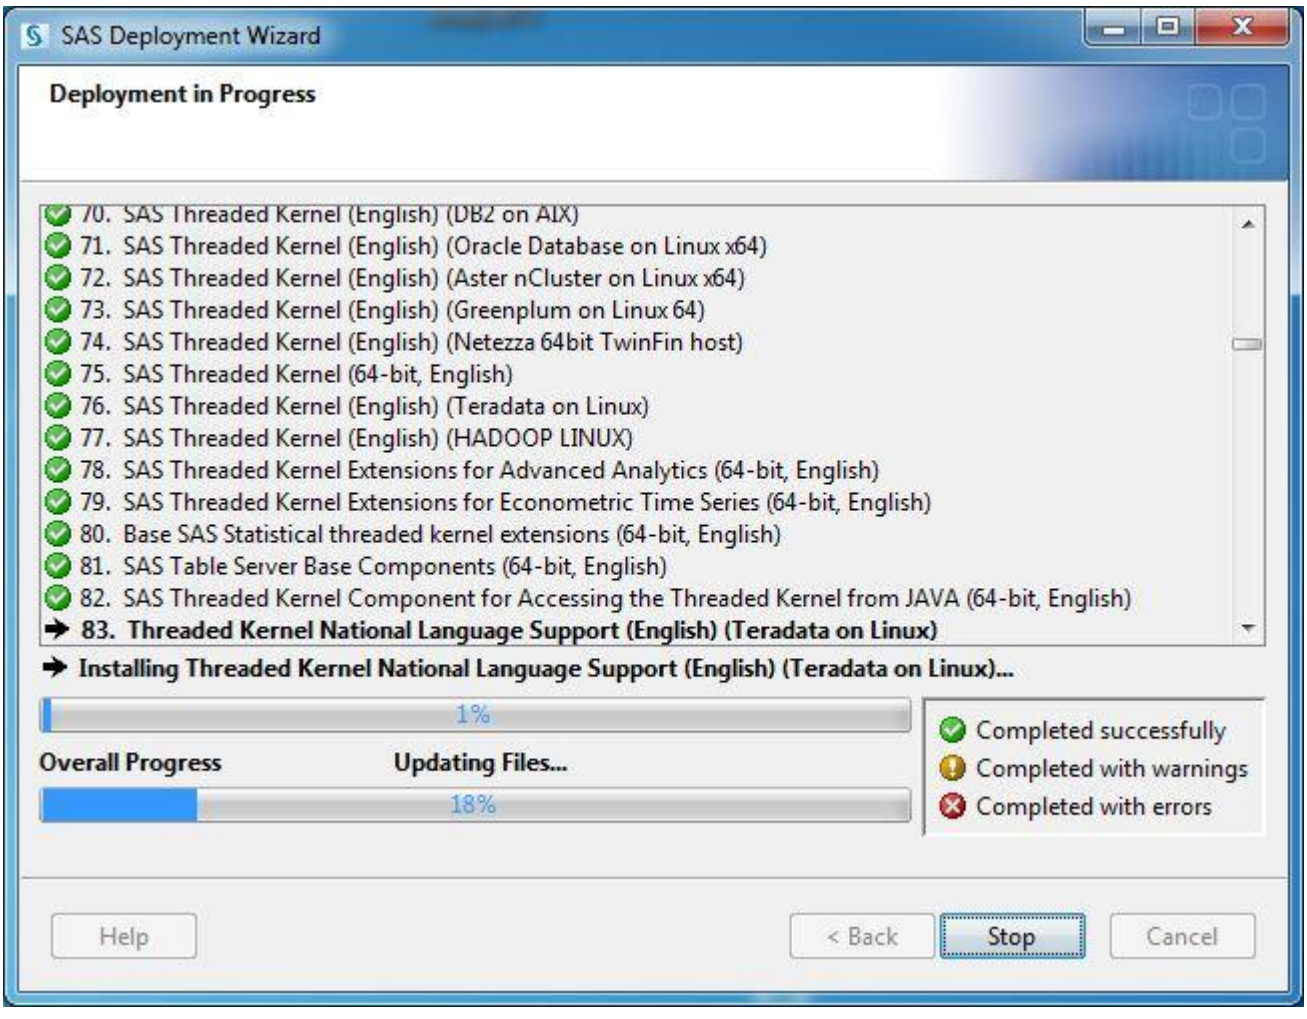

22. At some point during the installation, you will be prompted to insert another disk or to indicate the location of the next mounted ISO file.

    Manually eject Disk 1. Insert Disk 2 and click on *OK*. If using the mounted ISO files browse to the drive letter of the next disk.

    The installation will continue. During the installation process you will be asked to switch disk back and forth multiple times.

There are server disks or files in this set.

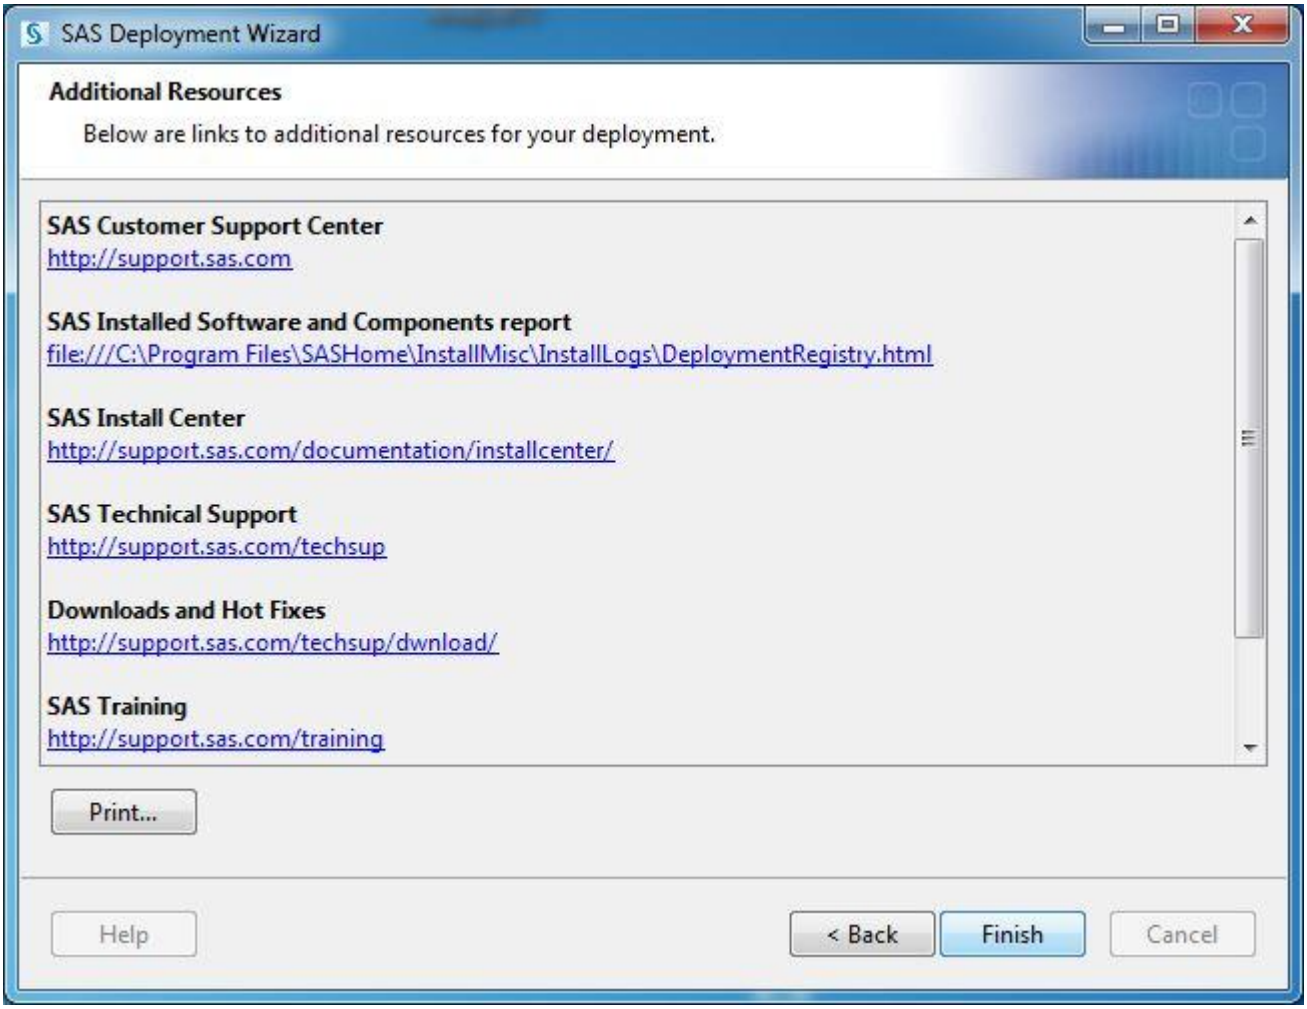

23. Select Do Not Send and click on *Next*.

24. Click on *Finish*.

25. Your default web browser will open with a deployment Summary. You may close this window.

26. You are now ready to use SAS 9.4.
